Chapter 62: The Expanding Forces of the Inner Worlds (Within A Month)

The Divine Triad's inner worlds are not static, but ever-expanding realms that grow and evolve with time. However, the flow of time within these realms operates on a different scale compared to the outside multiverse. While a single day in the outside multiverse corresponds to a full year in the inner worlds, this temporal difference has profound implications for the growth and development of these worlds.

Because of this time dilation, everything within the inner worlds—be it the realms themselves, their inhabitants, or their forces—continuously expands and increases in scale over time. A year inside a realm represents a 365-day cycle, during which the forces grow exponentially. Therefore, the forces of each realm, including the Lumiel's Army of Light, Umbrios' Shadow Legion, and Drakion's Draconic Host, will continue to grow as time flows, creating an ever-expanding military power.

Calculating the Growth of Forces in a Month Outside the Inner Worlds

Given that one day outside equals one year inside, the forces of the Inner Worlds will grow significantly within the span of even a single month outside.

A single month in the outside multiverse (30 days) corresponds to 30 years inside the inner worlds.

Let's calculate how much each force will increase within that time frame:

---

1. Lumiel's Army of Light (Luxoria Eterna)

Celestial Archons: 10,000

Increase in a Month: 10,000 * 30 = 300,000

Total: 310,000

Luminara Knights: 1 billion

Increase in a Month: 1,000,000,000 * 30 = 30 billion

Total: 31 billion

Lightborn Legion: 100 billion

Increase in a Month: 100,000,000,000 * 30 = 3 trillion

Total: 3 trillion

Seraphim Riders: 5 million

Increase in a Month: 5,000,000 * 30 = 150 million

Total: 155 million

---

2. Umbrios' Shadow Legion (Umbra Nexum)

Shadow Warlords: 50,000

Increase in a Month: 50,000 * 30 = 1.5 million

Total: 1.55 million

Ebon Knights: 500 million

Increase in a Month: 500,000,000 * 30 = 15 billion

Total: 15.5 billion

Nocturnal Stalkers: 10 billion

Increase in a Month: 10,000,000,000 * 30 = 300 billion

Total: 310 billion

Nightshade Beasts: 2 million

Increase in a Month: 2,000,000 * 30 = 60 million

Total: 62 million

---

3. Drakion's Draconic Host (Drakarys Aeterna)

Draconian Overlords: 20,000

Increase in a Month: 20,000 * 30 = 600,000

Total: 620,000

Flameborn Legionnaires: 1 billion

Increase in a Month: 1,000,000,000 * 30 = 30 billion

Total: 31 billion

Skybound Wyverns: 100 million

Increase in a Month: 100,000,000 * 30 = 3 billion

Total: 3.1 billion

Infernal Titans: 1 million

Increase in a Month: 1,000,000 * 30 = 30 million

Total: 31 million

Summary of Growth Over a Month Outside the Inner Worlds

In a single month outside the inner worlds, the forces of the Divine Triad's Inner Worlds expand at a staggering rate. Here's a breakdown of the updated totals:

---

1. Lumiel's Army of Light (Luxoria Eterna)

Celestial Archons: 310,000

Luminara Knights: 31 billion

Lightborn Legion: 3 trillion

Seraphim Riders: 155 million

2. Umbrios' Shadow Legion (Umbra Nexum)

Shadow Warlords: 1.55 million

Ebon Knights: 15.5 billion

Nocturnal Stalkers: 310 billion

Nightshade Beasts: 62 million

3. Drakion's Draconic Host (Drakarys Aeterna)

Draconian Overlords: 620,000

Flameborn Legionnaires: 31 billion

Skybound Wyverns: 3.1 billion

Infernal Titans: 31 million

The Inner Worlds grow at an unimaginable rate, expanding in both size and military strength each month. The Divine Triad, having absolute control over these realms, ensures that their forces become increasingly more powerful with each passing moment. However, as noted, their reluctance to move these forces beyond their inner worlds remains unchanged. With the power of their legions growing exponentially, the Divine Triad ensures that the forces of the outer multiverse are more than capable of defending their realms from any threats that might arise.
